Check here if you will be eating lunch on ___Saturday ___Sunday ___Both

My special meal requirements are: _____

IMPORTANT NOTE: Any hours earned at Miami Nice will apply to the biennium which starts 3/1/17 and ends 2/28/19 Current Florida CE requirements for each biennium are: 6 hours Florida TQ, 2 hours medical errors, 2 hours Florida jurisprudence, 20 additional hours in general topics (only two of which may be practice management), for a total of 30 hours. You can only get credit for Florida jurisprudence or medical errors once in each biennium. (That means, if you take either one twice, you do not get any credit for the second course.) One hour of HIV/AIDS is no longer required, except for new graduates or new licensees who have not yet taken an HIV/AIDS course. However, any doctor can take HIV/AIDS and count that as one hour of general CE, and you can take HIV/AIDS more than once, provided it is a different lecture (generally, a different speaker).

Due to requirements in other states for approving continuing education, the Miami Dade Optometric Physicians Association will not be responsible for obtaining approval for these courses in advance. However, 10 hours will be COPE approved and perhaps more. It is the responsibility of doctors licensed in other states to determine if these courses meet the requirements of their state. Of course, all courses will be approved in Florida.

A block of rooms have been reserved at:

Hilton Miami Airport

5101 Blue Lagoon Road • Miami, FL 33126

Room Rate is \$169.00 plus tax until March 31, 2017.

Please call 1-800-HILTONS and ask to be transferred to reservations where an Associate will assist you.

Please be sure to mention Miami Nice when making your reservation.

Saturday, April 22, 2017

7:00 - 8:00 am **REGISTRATION and Breakfast**

8:00 - 9:40 am **GRAND ROUNDS IN ANTERIOR SEGMENT DISEASE - TQ - Carl Spear, O.D.**

This course features a wide variety of anterior segment clinical case challenges to illustrate practical management in a primary care clinical environment. Using interactive audience response technology attendees have the opportunity to participate in the diagnosis, management and treatment of cases. New technologies and treatments will be presented along with tried and tested treatment protocols. *Course Expires 6/18/2017*

9:40 - 10:00 am **COFFEE BREAK**

10:00 - 11:40 am **PREVENTION OF MEDICAL ERRORS WITHIN EYE CARE - Carl Spear, O.D.**

The different types of medical errors are presented including root cause analysis, error reduction, and future prevention that may be useful within a primary optometric eye care setting. Also presented are situation where medical error can sometimes lead to medical malpractice.

11:40 - 1:30 pm **LUNCH and Visit Exhibits**

1:30 - 3:10 pm **ARMD - FROM SPINACH TO INJECTION - TQ - Steven Newman, O.D.**

With all the recent studies being published on nutrition for ARMD, the disease process still advances in some cases. In this 2-hour seminar, Dr. Newman breaks down the disease process then guides the attending physicians through multiple case studies involving treatment options ranging from lifestyle changes to serial injection therapy.

3:10 - 3:30 pm **COFFEE BREAK**

3:30 - 5:10 pm **FLORIDA JURISPRUDENCE - John McClane, O.D.**

Sunday, April 23, 2017

7:30 - 8:00 am **REGISTRATION and Breakfast**

8:00 - 9:40 am **The Today Show - THE RETINAL CONSULTATION HOUR - Abstract and Needs Assessment - TQ Diana Shechtman, O.D.**

The care and diagnosis of retinal diseases is in constant state of evolution. This contributes to variability in what is defined as "standard of care." This course will set forth to educate the participant on the most up to date evidence based medicine (EBM) in addition to the spectrum of "real world" retina practice protocols/methodologies.

9:40 - 10:00 am **COFFEE BREAK**

10:00 - 11:40 am **OCT CASE STUDY - TQ - Diana Shechtman, O.D.**

Optical Coherence Tomography has revolutionized our understanding of retinal disease. Today Spectral domain technology has taken us to even greater heights. This lecture will provide a nuts and bolts approach using cases to understanding and interpret the OCT as well as provide an update on the latest in spectral domain technology, as well as OCTA.

11:40 - 1:00 pm **LUNCH and Visit Exhibits**

1:00 - 2:40 pm **OCULAR TRAUMA - TQ - Carlo Pelino, O.D.**

There are approximately 2.5 million ocular and orbital injuries in the US per year. This course covers the four main mechanisms that cause ocular trauma and specific ocular trauma to the adnexa, anterior segment, posterior segment, optic nerve and orbit. Treatment for trauma and pain control mechanisms including the use of oral and topical medications will be discussed.

2:40 - 3:00 pm **COFFEE BREAK**

3:00 - 4:40 pm **OCULAR MELANOMA - TQ - Carlo Pelino, O.D.**

This course will educate the optometrist on the more common ocular tumor lesions that present to the office. It will help differentiate ocular melanoma from ocular metastasis, choroidal nevus, etc. and stress the most up to date treatment options.

4:40 - 5:30 pm **AIDS AND PRIMARY EYE CARE UPDATE AND ASSOCIATED STD'S - Albert Woods, O.D.**

Miami Dade Optometric Physicians
Association
